

Backend Intern

Location: Singapore / Mumbai / Gurugram / Hybrid

Team: Pricing Engine

Type: Internship

Who we are

At CogoUniverse, we are on a mission to revolutionize global trade by tackling the \$3.4 trillion Trade Knowledge and Execution Gap that disproportionately impacts small and medium businesses. We are developing a new category — a Global Trade Platform — that empowers businesses to identify and connect with the right trade partners, optimize shipping and logistics costs, and improve cash flow and cash management.

Recognized as an Asia-Pacific High-Growth Company by the Financial Times and ranked among the Top 100 Indian Growth Champion Companies by the Economic Times, CogoUniverse is in hypergrowth mode. We're on track to reach \$1 billion in revenue by summer.

Your Role at CogoUniverse

Your objective would be to build backend logic and API that returns pricing based on both model and rules.

- Build FastAPI endpoints to return pricing results
- Connect to PostgreSQL and ClickHouse to fetch inputs
- Add backup rules for edge cases like storms or congestion
- Track and version logic changes
- Write tests for everything

Success Metrics:

- Launch /predict-price API
- Add 5+ rule-based backup conditions
- Test coverage >90%
- Store every API call for audit trail
- Maintain <200ms average response time

Qualifications Required

- Departments: Computer Science, Software Engineering
- Skills Good to Have: Python (FastAPI), REST APIs, basic SQL (PostgreSQL, Redis)
- Learnability: Ability to understand backend architecture quickly and build scalable APIs Goal: Build backend logic and API that returns pricing based on both model and rules.

Fuel your Future with CogoUniverse

- Build backend systems that directly serve real-time freight pricing
- Understand the principles of scalable API and backend architecture
- Work on blending AI predictions with rule-based systems in production
- Gain practical skills in FastAPI, PostgreSQL, and scalable design patterns
