

Data Science Intern

Location: Singapore / Mumbai / Gurugram / Hybrid

Team: Pricing Engine

Type: Internship

Who we are

At CogoUniverse, we are on a mission to revolutionize global trade by tackling the \$3.4 trillion Trade Knowledge and Execution Gap that disproportionately impacts small and medium businesses. We are developing a new category — a Global Trade Platform — that empowers businesses to identify and connect with the right trade partners, optimize shipping and logistics costs, and improve cash flow and cash management.

Recognized as an Asia-Pacific High-Growth Company by the Financial Times and ranked among the Top 100 Indian Growth Champion Companies by the Economic Times, CogoUniverse is in hypergrowth mode. We're on track to reach \$1 billion in revenue by summer.

Your Role at CogoUniverse

- Use data like shipping indices, fuel prices, FX rates, and port congestion
- Train models like Linear Regression, ARIMA, and XGBoost
- Compare model-based pricing vs rule-based pricing
- Package your predictions for the engineering team
- Write a summary report on your modeling logic

Success Metrics:

- Build a model with error $\leq 10\%$
- Use at least 6 input features
- Test model vs business rules and write comparison
- Share a ready-to-use prediction format with backend team
- Write a report on assumptions and pricing logic

Qualifications Required

- Departments: Data Science, Applied Mathematics, Statistics
- Skills Good to Have: Python (pandas, sklearn, statsmodels), basic understanding of regression and time series models
- Learnability: Curiosity to apply modeling to real-world freight pricing, ability to iterate fast based on feedback Goal: Use both data-driven models and business rules to predict container shipping prices.

Fuel your Future with CogoUniverse

- Work on live freight and economic data from real-world supply chains
- Build models that directly influence container freight pricing
- Develop expertise in applied machine learning with real business constraints
- Create a portfolio of pricing models and business simulations
