

Location: Singapore / Mumbai / Gurugram / Hybrid

Team: Pricing Engine

Type: Internship

Who we are

At CogoUniverse, we are on a mission to revolutionize global trade by tackling the \$3.4 trillion Trade Knowledge and Execution Gap that disproportionately impacts small and medium businesses. We are developing a new category — a Global Trade Platform — that empowers businesses to identify and connect with the right trade partners, optimize shipping and logistics costs, and improve cash flow and cash management.

Recognized as an Asia-Pacific High-Growth Company by the Financial Times and ranked among the Top 100 Indian Growth Champion Companies by the Economic Times, CogoUniverse is in hypergrowth mode. We're on track to reach \$1 billion in revenue by summer.

Your Role at CogoUniverse

Your objective would be to bring in external data from APIs and keep it updated in our system.

- Connect to APIs like MarineTraffic and OpenWeatherMap
- Clean and reformat incoming data
- Push it into ClickHouse and PostgreSQL
- Set up regular jobs (cron or Airflow)
- Monitor data freshness and reliability

Success Metrics:

- Integrate 4 external APIs
- Ensure timestamp and freshness consistency
- Run update jobs every 1–3 hours
- Add alerts for data failures
- Write clear schema docs for each feed

Qualifications Required

- Departments: Computer Science, Data Engineering
- Skills Good to Have: Python (API handling, cron jobs, Airflow basics), ClickHouse/PostgreSQL
- Learnability: Willingness to work with real-time data pipelines and external data feeds
Goal: Feed the pricing engine with live inputs (congestion, weather, fuel, FX).

Fuel your Future with CogoUniverse

- Integrate real-time data feeds like weather, congestion, and currency rates
- Automate external API ingestion and monitoring pipelines
- Learn how live data influences pricing in dynamic markets
- Master operational reliability practices for data systems
